ABOUT ME

I am an ambitious, beginner web developer with a strong passion for programming and solid foundations in various technologies. I have been learning programming for about 2 years through my education and self-initiated projects. During this time, I have created several web applications and websites, which have allowed me to gain practical skills in creating, optimizing, and maintaining applications. I have experience working in teams and effectively communicating with clients thanks to my previous professional roles. I am also taking my first steps in freelancing, actively seeking clients and completing freelance projects. I am looking for opportunities to work in a dynamic IT environment where I can further develop my skills and passion for creating software.

EDUCATION

Mechanical and Electrical Technical School   2008 -2012
Electronics Technician

I gained strong problem-solving skills and the ability to adapt quickly to new technologies. I learned to create detailed technical documentation and take precise measurements. My education included programming and simulation of electronic circuits. These skills have provided me with a solid understanding that will help me in the programming industry.

EXPERIENCE

WebCraft Studio   2024 - present
Freelance Web Developer

- Creating websites for clients, from concept to implementation.
- Directly working with clients, understanding their needs, and delivering solutions that meet their expectations.
- Optimizing websites for performance and SEO.
